SYMPOSIUM ON BASEMENT MEMBRANE

Cell and Molecular Biology of Basement Membrane in Health and Disease is a symposium to be held at the Airlie Center, Virginia on September 20–22, 1991. Molecular interactions and cell receptors, regulation of gene expression, development and growth regulation, regulation of degradation of basement membrane, and basement membrane involvement in various disease states will be discussed. Formal presentations, informal discussions, and poster sessions will be included. This symposium will be chaired by Drs. Nicholas Kefalides, Lance Liotta, and Eric Neilson. Attendance is limited. For further information, please contact Dr. Nicholas Kefalides, Connective Tissue Research Institute, University City Science Center, 3624 Market Street, Philadelphia, PA 19104; (215) 387-2255.

INTERNATIONAL SYMPOSIUM ON ACUTE RENAL FAILURE

The International Symposium on Acute Renal Failure will be held October 2–4, 1991, at the University of North Carolina at Chapel Hill, North Carolina. This meeting will honor Dr. E.G.L. Bywaters at the 50th anniversary of the publication of his observations on crushing injuries and acute renal failure. Topics will include posttraumatic acute renal failure, disaster assistance for acute renal failure, prevention of acute renal failure associated with renal transplantation, ischemic and nephrotoxic renal injury, recovery from renal injury, the molecular biology of renal injury and repair, and acute renal failure in glomerular disease. For further information, contact the Office of Continuing Medical Education, 231 MacNider Building, CB#7000, Chapel Hill, NC 27599-7000; (919) 962-2118.

MEMORIAL LECTURESHIP

The 1991 Morita Lecture will be given October 23rd at William Beaumont Hospital, Royal Oak, Michigan, by Dr. Richard J. Glassock, Professor and Chairman of the Department of Medicine at Harbor-UCLA Medical Center. His subject will be the nephrotic syndrome. The lectureship, established in 1977, honors the memory of Dr. Yoshikazu Morita, late Chairman of Medicine and Chief of Nephrology at Beaumont. Previous lecturers have been Drs. Neal S. Bricker, John S. Najarian, Henry L. Barnett, John Hodson, Joseph E. Murray, Richard L. Tannen, Jacob Churg, J. Stewart Cameron, David E. R. Sutherland, Robert H. Heptinstall, Alfred F. Michael, Jay Y. Gillenwater, and Franklin H. Epstein.

ASN ANNUAL MEETING

The American Society of Nephrology will hold its annual meeting November 17–20, 1991, in Baltimore, Maryland. The deadline for submission of abstracts is June 28, 1991.
THE ART OF NEPHROLOGY

The editors of JASN invite subscribers to submit "clip art" that can be used to fill out manuscript pages in the body of the journal. Pen and ink drawings and computer-derived figures (black on white) of a general nature are welcome, but innovative creations that illustrate renal themes or concepts are preferred. Send your drawings (unsigned) to the editorial office:

Editorial Office, JASN
University of Kansas Medical Center 6068 F
39th and Rainbow
Kansas City, KS 66103

Contributors will be acknowledged in the June issue of each volume.

IPNA CONGRESS

The 9th Congress of the International Pediatric Nephrology Association (IPNA) will be held in Jerusalem, Israel, from August 30 until September 4, 1992. The Congress President is Alfred Drukker, Division of Pediatric Nephrology, Shaare Zedek Medical Center, P.O. Box 3235, Jerusalem 91031; 972-2-555111; FAX: 972-2-385276. For further information, please con-
tact the secretarial office of IPNA % Ortra Ltd; 972-3-664825; FAX: 972-3-660952.

INTERNATIONAL SOCIETY FOR PERITONEAL DIALYSIS

The VIth Congress of the International Society for Peritoneal Dialysis will be October 1–4, 1992, in Thessaloniki, Greece. For additional information, please write to:

Secretariat: 1st Department of Internal Medicine
AHEPA University Hospital
546 36 Thessaloniki, Greece

VOLUME 1
SUBJECT INDEX

Acidosis
ammoniagenic response to, prostaglandin inhibition, kidney epithelial cell culture, 882
distal renal tubular
ammonium transport in the kidney and, 1193
toluene abuse and, 1019
metabolic, toluene abuse and, 1019
Acquired immunodeficiency syndrome, drug therapy, renal aspects, 1061
Actin, epithelial cell biology, ischemic acute renal failure, 1263
Acylglycine, role, hypoxic injury, proximal tubule, rabbit, 949
Adenosine triphosphate, glycine protection against hypoxic injury, proximal tubules, rabbit, 949
Afferent arteriole, vasoconstriction, calcium antagonist effect, S3
AIDS: see Acquired immunodeficiency syndrome
Albumin, synthesis, increase, nephrotic hyperlipidemia, 575
Albuminuria
effect of angiotensin-converting enzyme inhibitors, experimental diabetes, S51
historical perspective, American nephrology, 1128
Aldose reductase, sorbitol production and, during diuresis and antiuricuresis, 58
Allopurinol, role during reoxygenation injury, rat renal tubule, 959
Aluminum
osteomalacia, high PTH level effect, rat, 970
uptake and toxicity, cultured mouse hepatocytes, 1299
Alzet miniosmotic pump, PTH administration, aluminum-induced osteomalacia, rat, 970
p-Aminohippuric acid, clearance, after thyroxine treatment, acute renal failure, rat, 1236
Ammoniagenesis, response to acute acidosis, prostaglandin inhibition, kidney epithelial cell culture, 882
Ammonium
excretion rate, toluene abuse and distal renal tubular acidosis, 1019
urinary excretion, new physiological concepts, 1193
Amylase, peritoneal fluid levels, differential diagnosis, peritonitis, 1186
Aneurysm
intracranial
diagnosis, autosomal dominant polycystic kidney disease, 84
screening guidelines, polycystic kidney disease, 9
Angiography, cerebral, autosomal dominant polycystic kidney disease, 9
Angiotensin
mediator of proteinuria, renal hemodynamics and permselectivity, S55
receptor characteristics, cyclosporine effect, rat, 1253
Angiotensin-converting enzyme
inhibition
proteinuria-hyperlipidemia relationship, nephrotic syndrome, 575
renal disease induced by, 845
inhibitors
endothelium-mesangium interactions, glomerular injury, S13
glomerular sclerosis reduced by, S21
Angiotensin II
effect on intraglomerular pressure, diabetic patients, S59
mediator of endothelial-mesangial cell communication, glomerular injury, S13
renal microvascular actions, S3
Anion gap, pyridostigmine bromide effect, 1123
Anisotonic, proximal volume regulation, hypo-osmotic media, 211
Anoxia
during reoxygenation, oxygen radical role, rat renal tubule, 959
effect on rabbit proximal tubule element content, microanalytical imaging study, 1321
Antibiotics, beta-lactams, renal mitochondrial toxicity, 815
Antibody
human gp330, passive Heymann nephritis in rats induced by, 792
anti-cardiolipin, renal disease and, case reports, 777
anti-endothelin, cyclosporine-induced renal vasoconstriction and, isolated perfused kidney, 76
Antidiuretic hormone, membrane phosphoprotein modulation, toad urinary bladder, 1114
Anti-glomerular basement membrane disease, fibronectin role, rabbit model, 1334
Antipporter, Na+"H", regulation of intracellular pH, inner medullary collecting duct cells, rabbit, 890
Apical membrane, lipid and protein polarity, ischemic acute renal failure, 1263
Arachnoid cyst, presymptomatic diagnosis, autosomal dominant polycystic kidney disease, 84
Ascorbic acid, role, hyperoxalemia and oxalosis, dialysis patients, 1289
Atherogenesis, hypertension feature, diabetic patients, S39
Atherosclerosis, endothelial cell biology and, 931
Atrial natriuretic factor, human, effect, cadaveric renal transplantation, 1081
Atrial natriuretic peptide
analog, urodiatin role, regulation of sodium homeostasis, 1109
protection, cold ischemic injury, rat kidney, 927
Atriopeptin, role, renal sodium excretion, 867
Basement membrane
abnormality, slowly progressive polycystic kidney disease, murine model, 980
mediation of immune glomerular injury, 13
myo-inositol supplementation effect, diabetic nephropathy model, 1220
tubular, T cell regulation in autoimmune, 140
Basolateral membrane, lipid and protein polarity, ischemic acute renal failure, 1263
B Cell, proliferation, PTH inhibition of, 236
Biopsy: see Kidney, biopsy
Blood flow, cerebral, autoregulation, chronic hypertension effects, 53
Bone formation rate, PTH effect, aluminum-induced osteomalacia, rat, 970
Bradykinin, protection, hypoxic injury, medullary thick ascending limb, 808
Brain: see also Cerebral
occult aneurysms, screening guidelines, polycystic kidney disease, 9
synaptosome, effect of chronic PTH excess, rat, 1162
Bright's disease, historical perspective, American nephrology, 1128
Butyrate, role, hypoxic injury, proximal tubule, rabbit, 949
Calcium
cytosolic, chronic PTH excess and, brain synaptosomes, rat, 1162
parathyroid gland gene expression and, experimental uremia, 99
role, pathogenesis of hypertension, 43
transport, vitamin D metabolism and mechanisms of, 30
Calcium antagonists
preface, S1
renal microvascular actions, S3
Calcium binding protein, vitamin D-dependent, role, calcium transport, 30
Calcium channel blockers
endothelium-mesangium interactions, glomerular injury, S13
experimental glomerular injury, S21
organ transplantation, S28
Calcium ionophores, oxygen deprivation and, proximal tubules, 1305
Calcium oxalate, crystal binding pattern, inner medullary duct cells, 187
Calcium pump, calcium absorption role, vitamin D-endocrine system, 30
cAMP, transepithelial water permeability and, polycystic kidney model, 278
Cancer, prediction, kidney weight and, acquired cystic disease, 828
Captopril, effects on kidney function, diabetic patients, S59
Carbapenum, renal mitochondrial toxicity, 815
Carbohydrate, metabolism, abnormalities, hypertension and, S39
Carotid artery, unilateral traction, natriuretic effect, 266
CD9, BL26 antigen as murine homolog of, 1153
Cell differentiation, during renal ontogeny, murine tubular epithelium, 1153
Cell growth, early transcripational events, 859
Cell injury, bubble cell, urinary sediment, renal insufficiency, 999
Cell proliferation, slowly progressive polycystic kidney disease, murine model, 980
Cell volume, proximal tubule regulation, hypo-osmotic media, 211
Cephalosporin, renal mitochondrial toxicity, 815
Cerebral physiology, structural remodelling and vascular mechanisms, chronic hypertension and, 53
Cholesterol
elevated, hypertension and abnormal carbohydrate metabolism, S39
proteinuria-hyperlipidemia relationship, nephrotic syndrome, S75
renal tissue content, renal disease progression, S69
Choroid plexus, blood flow, chronic hypertension effects, 53
Chromosome 9, slowly progressive polycystic kidney disease, murine model, 980
Colchicine, renal fibrosis reduction by, 257
Collagen
short-chain, synthesis by mesangial cells, 785
transcription and secretion, myo-inositol supplementation effect, 1220
Collecting duct
intracellular pH regulation, proton transport mechanisms, 890
ultrastructural localization of carbonic anhydrase II, 245
Complement, transformation and adsorption, hemodialysis membrane biocompatibility, 150
Converting enzyme, inhibition, glomerular size selectivity and, diabetic patients, S64
Crescents, anti-glomerular basement membrane disease, colchicine efficacy, 257
Cyclosporin A, stimulatory effect, transcription and procollagen secretion, proximal tubular cells, 918
Cyclosporine
glomerular endothelin binding promoted by, rat, 1253
nephrotoxicity
calcium channel blocker role, S28
endothelin as mediator of, 76
renal dysfunction by, inhibition of protein synthesis and, rat, 1212
Cysteamine, cystine depletion by, nephropathic cystinosis, 1028
Cystic disease, acquired, carcinoma prediction as function of kidney weight, 828
Cystine, storage defect, nephropathic cystinosis, 1028
Cystinosis, nephropathic, renal tubular cell culture from patients with, 1028
Cystochrome P-450, glue-snifing and distal renal acidosis, 1049
Cytoxin, interaction with endothelium, inflammation, immunity, and vascular injury, 225
Cytoskeleton
epithelial differentiation during early nephrogenesis, determinants of, 127
new insights, ischemic acute renal failure, 1263
Deoxyribonucleic acid, thyroxine effect on nephrotoxic acute renal failure, rat, 1236
Dextran, clearance, hexadimethrine-induced proteinuria, rat, 1095
Diabetes
hypertension and, cardiovascular risks, S39
nephropathy, myo-inositol supplementation effect, 1220
Dialysis
acquired cystic disease, kidney weight as carcinoma prediction, 828
anemia associated with, epoetin beta therapy, clinical trial, 990
hemoperfusion and, sequential versus simultaneous treatment, theophylline intoxication, 923
initiation and withdrawal, nephrologist attitudes, 1284
nephrotoxic drug guidelines, HIV infection and AIDS patients, 1061
peritoneal role, peritoneal fluid amylase levels, 1186
secondary hyperparathyroidism and oxalosis and, 1289
Diet
low-protein, adaptation to, chronic renal failure, 66
modification, clinical trials, renal disease, 1087
1,25-Dihydroxyvitamin D, parathyroid gland gene expression and, experimental uremia, 99
Glycolysis, glycine protection, hypoxic injury, proximal tubules, rabbit, 949
gp330 protein, similarities, Heymann nephritis and membranous glomerulonephritis, 792
Growth hormone, recombinant, growth-retarded children with chronic renal insufficiency, 1136
H^-ATPase, regulation of intracellular pH, inner medullary collecting duct cells, rabbit, 890
Hematocrit, systemic, role, salt-sensitive hypertensive renal disease, rat, 1180
Hemodialysis: see Dialysis
Hemodialysis membrane, biocompatibility of, 150
Hemodynamics, systemic and renal, modulation, nitric oxide role, rat, 1271
Hepatocyte, aluminum uptake and toxicity, mouse cell line, 1299
Heymann nephritis, gp330 autoantigen, similarities, human gp330, 792
Histomorphometry, hypertrophy of renal mitochondria, 822
HIV: see Human immunodeficiency virus
HLA class II antigen, role, differentiation, cytomegalovirus infection and acute rejection, 1204
Homeostasis, acid-base, effect of NaCl dietary variations, 193
\( \alpha \)-Human atrial natriuretic peptide, renal sodium excretion regulation and, 867
Human immunodeficiency virus drug therapy, renal aspects, 1061
nephropathy, zidovudine therapy, letter, 842
Hydrochlorothiazide, inhibition, sodium chloride transport, distal tubule, 832
Hyperlipidemia, proteinuria reduction and, nephrotic syndrome, S75

Osteoid, aluminum-induced osteomalacia, PTH effect, rat, 970
Osteomalacia, aluminum-induced, high PTH level effect, rat, 970
Oxalate, biosynthesis and urinary excretion, hemodialysis patients, 1289
Parathyroid gland, gene expression, regulation, experimental uremia, 99
Parathyroid hormone
B cell proliferation inhibited by, chronic renal failure, 236
phosphaturic effect, restoration by propranolol infusion, 200
Peritoneal dialysis: see Dialysis
Peritonitis, differential diagnosis, peritoneal amylase levels and, dialysis patients, 1186
pH, intracellular, regulation, proton transport mechanisms, 890
Phosphate, deprivation and reabsorption, propranolol effect, 200
Phospholipids, apical and basolateral membranes, ischemic acute renal failure, 1263
Phosphoprotein, modulation by antidiuretic hormone, toad urinary bladder, 1114
Phosphorus, toxicity, partially nephrectomized dog, 1169
Polycystic kidney disease
occult intracranial aneurysms in, screening guidelines, 9
progressive, hereditary model, mouse, 980
Polymerase chain reaction, cytomegalovirus DNA detection, IgA nephropathy, letter, 841
Potassium, electrolyte abnormalities, toluene abuse-associated, 1019
Potassium dichromate, nephrotoxic acute renal failure induced by, thyroxine effect, rat, 1236
Procollagen, secretion, stimulatory effect of cyclosporin A, proximal tubular cells, 918
Proliferation, versus hypertrophy, renal mitochondria, after unilateral nephrectomy, 822
Propranolol, effect on phosphaturic effect of PTH, phosphate-deprived rats, 200
Prostaglandin
ammoniagenic response inhibited by, acute acidosis, kidney epithelial cell culture, 882
endogenous, protective function, injury, medullary thick ascending limb, 808
fish oil diet effect, rat renal ablation model, 1343
Protein
adsorption, hemodialysis membrane biocompatibility, 150
degradation, dietary protein intake effect, acute renal failure, rat muscle, 1230
dietary, insulin-like growth factor I and renal hemodynamics response, rat, 1034
distribution and breakdown, rabbit anti-glomerular basement membrane disease, 1334
Protein synthesis
dietary protein intake effect, acute renal failure, rat muscle, 1230
microsomal, inhibition, during cyclosporine nephrotoxicity, rat, 1212
Proteinuria
hexadimethrine-induced, glomerular structure alteration during, rat, 1095
progressive renal injury and, anemia effect, hypertensive rat, 1180
renal dynamics and permselectivity, S55
thromboxane synthesis inhibition and, remnant kidney, 799
Proto-oncogene, elevated expression, murine polycystic kidney, 1048
Proximal tubule
cell surface membrane polarity, ischemic acute renal failure, 1263
chloride delivery rate, effect on pressure natriuretic response, 180
experimental anoxia methods, 837
hypoxic injury, glycine protection, metabolic aspects, rabbit, 949
inorganic mercury transport, rabbit, 910
reoxygenation injury, xanthine oxidase and oxygen free radical role, rat, 959
secretion, organic cations, OK cells, 902
volume regulation, hypo-osmotic media, 211
PTH: see Parathyroid hormone
Pyridostigmine bromide, effect on serum bromide concentration and anion gap, 1123
Renal cell, injury, experimental anoxia methods, 837
Renal cyst
elevated proto-oncogene expression and, murine polycystic kidney, 1048
transepithelial water permeability, vasopressin effect, 278
Renal failure acute
angiotensin-converting enzyme inhibitor-induced, 845
gentamicin-induced, dietary protein intake effect, rat, 1230
ischemic, cell biology of, 1263
mechanisms of cyclosporin nephrotoxicity, 162
renal tubular cells in urine sediment, 999
calcium channel blocker role, organ transplantation, S28
chronic
anemia, epoetin beta therapy, clinical trial, 990
chronic PTH excess effect, rat, 1162
hemodynamics, hypertensive rat, 1180
inhibition of B cell proliferation, 236
low-protein diet effect, 66
dietary mineral restriction effect, partially nephrectomized dog, 1169
elevated proto-oncogene expression, murine polycystic kidney, 1048
fish oil diet effect, rat renal ablation model, 1343
secondary hyperparathyroidism of, calcium and 1,25-dihydroxyvitamin D treatment, 99
Renal hemodynamics, glomerular permselectivity influenced by, S55
Renal Insufficiency
chronic, recombinant growth hormone use, growth-retarded children, 1136
progressive, pathophysiology, symposium introduction, S49
Renal medulla, collecting duct, enzyme activity changes during diuresis and antidiuresis, S8
Renal plasma flow
angiotensin-converting enzyme inhibitor effect, essential hypertension, S80
diastolic derived relaxing factor effect, normal rat kidney, 875
increased insulin-like growth factor I plasma levels and, high and low-protein diet, rat, 1034
thromboxane synthesis inhibition and, remnant kidney, 799
Renal tubule: see also Distal tubule; Proximal tubule
abnormalities, renal sodium and water handling, hypothyroid patients, 205
ammonium transport, distal renal tubular acidosis and, 1193
Renal vascular resistance
angiotensin-converting enzyme inhibitor effect, essential hypertension, S80
cyclosporine effect, endothelin as mediator of, 76
endothelial derived relaxing factor effect, normal rat kidney, 875
Renin
angiotensin-converting enzyme inhibitors in diabetes, kidney and blood pressure effects, 559
effect of angiotensin-converting enzyme inhibitors, experimental diabetes, 551
plasma activity, potassium depletion and, 43
Renography, angiotensin-converting enzyme inhibitor role, 845
Retinopathy, hypertension in diabetic patients, 539
Rhodamine-123, fluorescence, hyper trophy of renal mitochondria, 822
Run-off translation, renal microsomal protein synthesis measured by, during cyclosporine nephrotoxicity, 1212
Saturation, uric acid crystal binding and, inner medullary collecting duct cells, 187
Scarring, anti-glomerular basement membrane disease, colchicine efficacy, 257
Sclerosis, hypertrophic glomeruli, homozygous sickle hemoglobin (SS) disease, 1241
Septic shock, endothelial modulation of vasomotor tone and, 931
Signal transduction, early transcriptional events, eukaryotic cells, 859
Sodium
electrolyte abnormalities, toluene abuse-associated, 1019
excretion
circadian regulation, urodilatin role, 1109
endothelial derived relaxing factor role, normal rat kidney, 875
low-dose endothelin effect, 1278
renal tubular abnormalities, hypothyroid patients, 205
unilateral carotid artery traction and, 266
urodilatin versus atrial natriuretic peptide, 867
-glucose cotransport, angiotensin stimulation, proximal straight tubule, 272
restriction, renal binding of 3H-metolazone and, 91
role, pathogenesis of hypertension, 43
transport, angiotensin stimulation, rat proximal straight tubule, 1146
Sodium bicarbonate, dietary supplementation, plasma acid-base composition and, 193
Sodium chloride, transport, thiazide inhibition, 832
Sodium-hydrogen exchange, intracellular pH regulation and, inner medullary collecting duct cells, rabbit, 890
Sorbitol dehydrogenase, sorbitol production and, during diabetes and antidiuresis, 58
SS disease, maximal glomerular hypertrophy, focal glomerulosclerosis development in, 1241
Tetraethylammonium, transport by OK cells, 902
The American Society of Nephrology
abstracts of 23rd annual meeting, 287
congressional award, recipient, remarks by, 1017
Homer Smith Award, remarks by recipient of, 1060
1990 presidential address, 1009
The National Kidney and Urologic Diseases Advisory Board, executive summary, 1990 annual support, 105
Theophylline
extracorporeal elimination, 923
intoxication, management, hemodialysis and hemofiltration, 923
Thiazide, renal binding of 3H-metolazone and, 91
Thromboxane
mechanism of extracellular matrix accumulation, cyclosporin nephrotoxicity, 162
receptor antagonism, mesangial cell immune injury, 1041
renal microvascular actions, 53
Thymidine incorporation, thyroxine effect, nephrotoxic acute renal failure, rat, 1236
Tight epithelia, antidiuretic modulation of membrane phosphoproteins, toad urinary bladder, 1114
Tissue culture, tetraethylammonium transport by OK cells, 902
Toluene, abuse, distal renal tubular acidosis and, 1019
Transcription factor, early growth response group, eucaryotic cells, 859
Triglyceride
- elevated, hypertension and abnormal carbohydrate metabolism, 539
proteinuria-hyperlipidemia relationship, nephrotic syndrome, 575
Tubular necrosis, acute, atrial natriuretic factor infusion effect, cadaveric renal transplant, 1081
Uric acid, crystal binding, inhibition by calcium oxalate, 187
Urinalysis, bubble cells, renal tubular cells in urinary sediment, 999
Urinary sediment, renal tubular cells in, renal insufficiency, 999
Urodilatin, excretion, role, circadian regulation of sodium excretion, 1109
Urolithiasis, microcrystal attachment and, characterization, inner medullary collecting duct cells, 187
Vasoconstriction, myogenic, calcium antagonist effect, 53
Vasopressin
-effect on transepithelial water permeability, polycystic kidney model, 278
membrane phosphoprotein modulation, toad urinary bladder, 1114
Verapamil, effect on cytosolic calcium, rat brain synaptosomes, chronic renal failure, 1162
Vitamin B6, deficiency, role, hyperoxalemia and oxalosis, dialysis patients, 1289
Vitamin D
metabolism, calcium transport mechanisms, 30
receptor, mRNA levels, experimental uremia, 99
Zidovudine, HIV-associated nephropathy treated with, letter, 842
