

**This Month's Highlights**

**UP FRONT MATTERS**

**ASN News**

- 381 **World Kidney Day 2010**  
Public Policy Board of the American Society of Nephrology

**Editorials**

- 383 **Diagnostic Application of the A<sub>1c</sub> Assay in Renal Disease**  
Adnan Sharif and Keshwar Baboolal
- 385 **Time to Recognize an Overlooked Trait**  
Kerri L. Cavanaugh and Sophie Lanzkron  
• See related article by Derebail et al. (pp. 413–417).
- 386 **Dependence of Renal Microvessel Density on Angiotensin II: Only in the Fetus?**  
Barbara J. Ballermann  
• See related article by Madsen et al. (pp. 448–459).
- 388 **ZO-1 and ZONAB Interact to Regulate Proximal Tubular Cell Differentiation**  
Ambra Pozzi and Roy Zent  
• See related article by Lima et al. (pp. 478–488).
- 390 **Of Mice and Men: Therapeutic mTOR Inhibition in Polycystic Kidney Disease**  
York Pei  
• See related article by Shillingford et al. (pp. 489–497).
- 392 **Endothelin Receptor Antagonists in Proteinuric Renal Disease: Every Rose Has Its Thorn**  
Eberhard Ritz and René Wenzel  
• See related article by Mann et al. (pp. 527–535).

**Clinical Commentary**

- 395 **Posing the Question Again: Does Chronic Uric Acid Nephropathy Exist?**  
Orson W. Moe

**Brief Reviews**

- 398 **Integrating Human and Rodent Data to Identify the Genetic Factors Involved in Chronic Kidney Disease**  
Michael R. Garrett, Marcus G. Pezzolesi, and Ron Korstanje
- 406 **Mechanisms Linking Obesity, Chronic Kidney Disease, and Fatty Liver Disease: The Roles of Fetuin-A, Adiponectin, and AMPK**  
Joachim H. Ix and Kumar Sharma

**BRIEF COMMUNICATION**

- 413 ★ **High Prevalence of Sickle Cell Trait in African Americans with ESRD**  
Vimal K. Derebail, Patrick H. Nachman, Nigel S. Key, Heather Ansele, Ronald J. Falk, and Abhijit V. Kshirsagar  
• See related editorial by Cavanaugh and Lanzkron (pp. 385–386).

**BASIC RESEARCH**

- 419 **Satellite Cell Dysfunction and Impaired IGF-1 Signaling Cause CKD-Induced Muscle Atrophy**  
Liping Zhang, Xiaonan H. Wang, Huiling Wang, Jie Du, and William E. Mitch
- 428 **GSK3 $\beta$  Mediates Renal Response to Vasopressin by Modulating Adenylate Cyclase Activity**  
Reena Rao, Satish Patel, ChuanMing Hao, James Woodgett, and Raymond Harris
- 438 ★ **Loss of MicroRNA-192 Promotes Fibrogenesis in Diabetic Nephropathy**  
Aleksandra Krupa, Robert Jenkins, Dong Dong Luo, Aled Lewis, Aled Phillips, and Donald Fraser
- 448 **Angiotensin II Promotes Development of the Renal Microcirculation through AT<sub>1</sub> Receptors**  
Kirsten Madsen, Niels Marcussen, Michael Pedersen, Gitte Kjærsgaard, Carie Facemire, Thomas M. Coffman, and Boye L. Jensen  
• See related editorial by Ballermann (pp. 386–388).

460 ★ **The MicroRNA-Processing Enzyme Dicer Maintains Juxtaglomerular Cells**  
Maria Luisa S. Sequeira-Lopez, Eric T. Weatherford, Julianna R. Borges, Maria C. Monteagudo, Ellen S. Pentz, Brian D. Harfe, Oscar Carretero, Curt D. Sigmund, and R. Ariel Gomez

468 **Atrap Deficiency Increases Arterial Blood Pressure and Plasma Volume**  
Mona Oppermann, Bernhard Gess, Frank Schweda, and Hayo Castrop

478 ★ **ZONAB Promotes Proliferation and Represses Differentiation of Proximal Tubule Epithelial Cells**  
Wânia R. Lima, Kleber S. Parreira, Olivier Devuyt, Adrian Caplanusi, Francisca N’Kuli, Benoit Marien, Patrick Van Der Smissen, Pedro M.S. Alves, Pierre Verroust, Erik I. Christensen, Fabiola Terzi, Karl Matter, Maria S. Balda, Christophe E. Pierreux, and Pierre J. Courtoy  
• See related editorial by Pozzi and Zent (pp. 388–390).

489 **Rapamycin Ameliorates PKD Resulting from Conditional Inactivation of Pkd1**  
Jonathan M. Shillingford, Klaus B. Piontek, Gregory G. Germino, and Thomas Weimbs  
• See related editorial by Pei (pp. 390–391).

### CLINICAL EPIDEMIOLOGY

499 **Propensity-Matched Mortality Comparison of Incident Hemodialysis and Peritoneal Dialysis Patients**  
Eric D. Weinhandl, Robert N. Foley, David T. Gilbertson, Thomas J. Arneson, Jon J. Snyder, and Allan J. Collins

### CLINICAL RESEARCH

507 **Autoimmunity in Membranous Nephropathy Targets Aldose Reductase and SOD2**  
Marco Prunotto, Maria Luisa Carnevali, Giovanni Candiano, Corrado Murtas, Maurizio Bruschi, Emilia Corradini, Antonella Trivelli, Alberto Magnasco, Andrea Petretto, Laura Santucci, Silvia Mattei, Rita Gatti, Francesco Scolari, Peter Kador, Landino Allegri, and Gian Marco Ghiggeri

520 ★ **Cerebral Microvascular Disease Predicts Renal Failure in Type 2 Diabetes**  
Takashi Uzu, Yasuo Kida, Nobuo Shirahashi, Tamaki Harada, Atsushi Yamauchi, Makoto Nomura, Keiji Isshiki, Shin-ichi Araki, Toshiro Sugimoto, Daisuke Koya, Masakazu Haneda, Atsunori Kashiwagi, and Ryuichi Kikkawa

527 ★ **Avosentan for Overt Diabetic Nephropathy**  
Johannes F.E. Mann, Damian Green, Kenneth Jamerson, Luis M. Ruilope, Susan J. Kuranoff, Thomas Littke, and Giancarlo Viberti, for the ASCEND Study Group  
• See related editorial by Ritz and Wenzel (pp. 392–394).

536 **Tubular Expression of KIM-1 Does not Predict Delayed Function After Transplantation**  
Bernd Schröppel, Bernd Krüger, Liron Walsh, Melissa Yeung, Shay Harris, Krista Garrison, Jonathan Himmelfarb, Susan M. Lerner, Jonathan S. Bromberg, Ping L. Zhang, Joseph V. Bonventre, Zhu Wang, Alton B. Farris, Robert B. Colvin, Barbara T. Murphy, and John P. Vella
