

This Month's Highlights

UP FRONT MATTERS

Editorials

- 421 **Lithium in Kidney Diseases: Big Roles for the Smallest Metal**
Man J. Livingston and Zheng Dong
• See related articles by Bao et al. (pp. 488–500); and de Groot et al. (pp. 501–510).
- 423 **Arrestin(g) Podocyte Injury with Endothelin Antagonism**
Roderick J. Tan and Youhua Liu
• See related article by Buelli et al. (pp. 523–533).
- 425 **Cardiovascular Events after AKI: A New Dimension**
Chi-yuan Hsu and Kathleen D. Liu
• See related article by Wu et al. (pp. 595–605).
- 427 **If Oxidative Stress Is an Appropriate and Specific Target, What Reagent Should We Choose?**
George A. Kaysen and Andrew Chin
• See related article by Himmelfarb et al. (pp. 623–633).

Brief Reviews

- 431 **Comparisons between Novel Oral Anticoagulants and Vitamin K Antagonists in Patients with CKD**
Ziv Harel, Michelle Sholzberg, Prakesh S. Shah, Katerina Pavenski, Shai Harel, Ron Wald, Chaim M. Bell, and Jeffrey Perl
- 443 **The Proximal Tubule and Albuminuria: Really!**
Landon E. Dickson, Mark C. Wagner, Ruben M. Sandoval, and Bruce A. Molitoris

BRIEF COMMUNICATION

- 455 ★ **Autoantibodies to hLAMP-2 in ANCA-Negative Pauci-Immune Focal Necrotizing GN**
Andrea Peschel, Neil Basu, Alexandra Benharkou, Ricarda Brandes, Markus Brown, Régis Dieckmann, Andrew J. Rees, and Renate Kain

BASIC RESEARCH

- 465 ★ **Hypoxia-Inducible Factor-1 α Causes Renal Cyst Expansion through Calcium-Activated Chloride Secretion**
Bjoern Buchholz, Gunnar Schley, Diana Faria, Sven Kroening, Carsten Willam, Rainer Schreiber, Bernd Klanke, Nicolai Burzlaff, Jonathan Jantsch, Karl Kunzelmann, and Kai-Uwe Eckardt
- 475 **The Transcription Factor E26 Transformation-Specific Sequence-1 Mediates Neointima Formation in Arteriovenous Fistula**
Wenguang Feng, Phillip Chumley, Michael Allon, James George, David W. Scott, Rakesh P. Patel, Silvio Litovsky, and Edgar A. Jaimes
- 488 **Delayed Administration of a Single Dose of Lithium Promotes Recovery from AKI**
Hui Bao, Yan Ge, Zhen Wang, Shougang Zhuang, Lance Dworkin, Ai Peng, and Rujun Gong
• See related editorial by Livingston and Dong (pp. 421–423).
- 501 **Lithium Causes G2 Arrest of Renal Principal Cells**
Theun de Groot, Mohammad Alsady, Marcel Jaklofsky, Irene Otte-Höller, Ruben Baumgarten, Rachel H. Giles, and Peter M.T. Deen
• See related editorial by Livingston and Dong (pp. 421–423).
- 511 ★ **Protein Phosphatase 1 Inhibitor-1 Deficiency Reduces Phosphorylation of Renal NaCl Cotransporter and Causes Arterial Hypotension**
Nicolas Picard, Katja Trompf, Chao-Ling Yang, R. Lance Miller, Monique Carrel, Dominique Loffing-Cueni, Robert A. Fenton, David H. Ellison, and Johannes Loffing
- 523 **β -Arrestin-1 Drives Endothelin-1-Mediated Podocyte Activation and Sustains Renal Injury**
Simona Buelli, Laura Rosanò, Elena Gagliardini, Daniela Corna, Lorena Longaretti, Anna Pezzotta, Luca Perico, Sara Conti, Paola Rizzo, Rubina Novelli, Marina Morigi, Carlamaria Zoja, Giuseppe Remuzzi, Anna Bagnato, and Ariela Benigni
• See related editorial by Tan and Liu (pp. 423–425).

534 Activation of mTORC1 in Collecting Ducts Causes Hyperkalemia

Zhenguo Chen, Heling Dong, Chunhong Jia, Qiancheng Song, Juan Chen, Yue Zhang, Pinglin Lai, Xiaorong Fan, Xuan Zhou, Miao Liu, Jun Lin, Cuilan Yang, Ming Li, Tianming Gao, and Xiaochun Bai

547 ★CD73-Dependent Generation of Adenosine and Endothelial Adora2b Signaling Attenuate Diabetic Nephropathy

Eunyoung Tak, Douglas Ridyard, Jae-Hwan Kim, Michael Zimmerman, Tilmann Werner, Xiaoxin X. Wang, Uladzimir Shabeka, Seong-Wook Seo, Uwe Christians, Jost Klawitter, Radu Moldovan, Gabriela Garcia, Moshe Levi, Volker Haase, Katya Ravid, Holger K. Eltzschig, and Almut Grenz

564 Suppression of Iron-Regulatory Hepcidin by Vitamin D

Justine Bacchetta, Joshua J. Zaritsky, Jessica L. Sea, Rene F. Chun, Thomas S. Lisse, Kathryn Zavala, Anjali Nayak, Katherine Wesseling-Perry, Mark Westerman, Bruce W. Hollis, Isidro B. Salusky, and Martin Hewison

574 Mutations in *PCBD1* Cause Hypomagnesemia and Renal Magnesium Wasting

Silvia Ferrè, Jeroen H.F. de Baaij, Patrick Ferreira, Roger Germann, Johannis B.C. de Klerk, Marla Lavrijsen, Femke van Zeeland, Hanka Venselaar, Leo A.J. Kluijtmans, Joost G.J. Hoenderop, and René J.M. Bindels

CLINICAL EPIDEMIOLOGY

587 Economic Evaluation of Frequent Home Nocturnal Hemodialysis Based on a Randomized Controlled Trial

Scott Klarenbach, Marcello Tonelli, Robert Pauly, Michael Walsh, Bruce Culleton, Helen So, Brenda Hemmelgarn, and Braden Manns

595 Long-Term Risk of Coronary Events after AKI

Vin-Cent Wu, Che-Hsiung Wu, Tao-Min Huang, Cheng-Yi Wang, Chun-Fu Lai, Chih-Chung Shiao, Chia-Hsui Chang, Shuei-Liong Lin, Yen-Yuan Chen, Yung-Ming Chen, Tzong-Shinn Chu, Wen-Chih Chiang, Kwan-Dun Wu, Pi-Ru Tsai, Likwang Chen, and Wen-Je Ko, for the NSARF Group

• See related editorial by Hsu and Liu (pp. 425–427).

606 ★A Within-Patient Analysis for Time-Varying Risk Factors of CKD Progression

Liang Li, Alexander Chang, Stephen G. Rostand, Lee Hebert, Lawrence J. Appel, Brad C. Astor, Michael S. Lipkowitz, Jackson T. Wright, Cynthia Kendrick, Xuelei Wang, and Tom H. Greene

CLINICAL RESEARCH

615 ★Prominent Accumulation in Hemodialysis Patients of Solutes Normally Cleared by Tubular Secretion

Tammy L. Sirich, Benjamin A. Funk, Natalie S. Plummer, Thomas H. Hostetter, and Timothy W. Meyer

623 Provision of Antioxidant Therapy in Hemodialysis (PATH): A Randomized Clinical Trial

Jonathan Himmelfarb, T. Alp Ikizler, Charles Ellis, Pingsheng Wu, Ayumi Shintani, Sanjay Dalal, Mark Kaplan, Michel Chonchol, and Raymond M. Hakim

• See related editorial by Kaysen and Chin (pp. 427–429).

634 Plasma Apolipoprotein L1 Levels Do Not Correlate with CKD

Leslie A. Bruggeman, John F. O'Toole, Michael D. Ross, Sethu M. Madhavan, Marlene Smurzynski, Kunling Wu, Ronald J. Bosch, Samir Gupta, Martin R. Pollak, John R. Sedor, and Robert C. Kalayjian

645 RETRACTIONS
