An error was found in the Figure 2L. The order for the glypican-1 pictures among the groups of Ctrl, Normal-PMPs, and Col-PMPs was wrong. The corrected version of the figure is presented here. The error does not alter the conclusions of the study.

Figure 2L. Expression of glypican-1 (green) and syndecan-1 (red) in GEnCs was determined by immunofluorescence staining. Nuclei were stained with DAPI (blue) (scale bars, 20 μm).
