
There are two locations where the dimensions are listed incorrectly in μm when they should be in nm. The first is in the abstract: “averaged 76 μm in diameter” should be “averaged 76 nm in diameter.” The second is in the Discussion: “within the reported 70–90 μm size range of SARS-CoV-2” should be “within the reported 70–90 nm size range of SARS-CoV-2.”
