A MESSAGE TO OUR SUBSCRIBERS

Williams & Wilkins and most other publishers seal issues of professional journals in polywrap bags to mail to subscribers. Although these bags are very effective in protecting issues from damage during transport, they are not biodegradable and pose serious environmental problems. A number of you have written to us to suggest that we change to biodegradable plastic or paper wrappers or no wrappers at all. We have considered the alternatives and have chosen the one imposing the least environmental threat—no wrappers for issues mailing to addresses within the United States. Second class postage regulations require that wrappers be used to mail issues outside the United States.

We hope your issues of THE JOURNAL OF THE AMERICAN SOCIETY OF NEPHROLOGY arrive in good condition. If they do not, please call us at 1-800-638-6423.

ALMA J. WILLS
